

DR. LEA CAMPOS

Assistant Principal
Woodstock Middle School
Caton, GA

HOW ARE YOUR STUDENTS ENJOYING SUITE360?

“ The students really like the interactive features and videos in the Suite 360 program. The **topics are relevant** and students can relate to them. From the lessons, they segue into sharing their own stories, and then of course the counselors are there to say to the students that if they wanted to talk more about any of these issues, then they can make an appointment with them. ”

HOW IS SUITE360 HELPING YOU REACH YOUR GOALS?

“ We wanted to make sure we had a program in place for teachers that is efficient, useful, and relevant. I was a classroom teacher for 10 years, so I saw all of these different programs come and go without much fidelity. Having this program that covers all these relevant topics, makes it interesting and engaging, and puts it on the students to go through at their own pace and reflect on their experiences helps teachers in the sense that we are not wasting time putting something together because **Suite 360 has all these great resources.** ”

HOW ARE YOU USING THE SUITE360?

“ We have a dedicated 20 minutes each week where basically the entire school shuts down to focus on our Suite 360 lessons. The students login, they start doing the lesson on their own using their phones or partner up in some classrooms. Some teachers have class sets of laptops, and some just have desktops which they let the students rotate through the program.

Also, on Tuesdays and Thursdays we have our What I Need sessions. They're called W.I.N Sessions, where the kids get remediation on the skills that they need, so **we're seeing a lot of growth** in the academics but also character development and social emotional learning as well. ”
